## About Us

**Aysan Ambalaj ve Plastik Sanayi Ticaret Ltd.Tic.** was established with a New Generation insight on the principles of education, future technologies, and innovative thinking; the company aims to provide services to the customers with consistent and high quality and in light of the latest developments in the sector, with modern, innovative, dynamic, and fast solutions, and it achieved success in a short time. Company aims to produce high-grade products of world-class quality with an annual capacity of 5500 tons. We engage with our clients in packaging solutions with our precise manufacturing and our 6000 m2 closed area, as well as the newest technology in our business. In our industry, we actively follow and react to international developments. With our dynamic solutions, we offer our customers with cost-effective and advantageous alternatives. Since our establishment, we always worked to fulfill our customers' needs and provide alternative products through the improvement of technology, knowledge, and a constantly expanding product portfolio. In the light of our knowledge, experience and innovative approach, we have a strong position in the industry with our high quality products.

## Production

With our state-of-the-art Blown COEx extrusion machine lines at our facility, we supply products with high quality standards to our customers. Multi-layer laminated films are produced using the necessary raw ingredients and additives on our CO-Ex extrusion lines. As a result, we can develop more durable and high-quality items. The films can be printed in six different colors.

**Industrial Packaging Solutions**

## **Bag**

The bags, which vary in light, medium and heavy loads, are specially produced according to the load to be carried and tear resistance.

- \* ***Film Thickness : 50mic – 300mic***
- \* ***The desired colored bag can be manufactured.***
- \* ***Flexo printing can be done on the bags***
- \* ***Safely protects your products against dirt, dust, moisture and other external factors.***
- \* ***Our bags are environmentally friendly and made from 100% recyclable plastic.***

## Shrink film

This is widely used in the packaging of goods like as drinks and water, as well as glass, wood, and metal.

Shrink films shrink with heat treatment and strongly wrap the goods, enabling goods to be safely packed and delivered to the consumer quickly and economically.

Our company produces shrink films at a low price and with high quality standards. Shrink film manufacture can be customized to customers preferences.

**Film Width: 15cm. – 150cm**

**Film Thickness : 30mic – 200mic**

- \* It is available in three textures: transparent, matte, and glossy.*
- \* The desired color film can be manufactured.*
- \* Flexo printing can be done on the films.*
- \* UV and antistatic additives can be added to the films.*

## Silage stretch film

Silage is a fermented, high-moisture feed that meets the nutritional needs of small and larger animals during the winter months when green plants are unavailable. With our cost-effective and practical solutions, we want to support farmers, breeders, and animal feed producers.

Width (cm)	Meter (metre)	Thickness (mic.)
50	1800	25-30
75	1500	25-30

- \* Production is made with Co-ex blown technology**
- \* High tensile and high strength**
- \* It has a high performance adhesive rate**
- \* Has excellent opacity and color intensity**
- \* UV resistant against sun rays for a minimum of 1 year**
- \* Suitable for food**
- \* Made from environmentally friendly 100% recyclable plastic**
- \* Cardboard or plastic bobbin options are available**
- \* It is used in every product made in bales. (Straw, clover, corn, pulp etc.)**
- \* Different color options are available**

## Layflat tubing

Regardless of the standard bag dimensions, layflat tubing can be cut to the desired dimensions and packaging can be created according to any desired dimension. Thanks to this feature, your products fully comply with the package content and you will save on excess packaging costs.

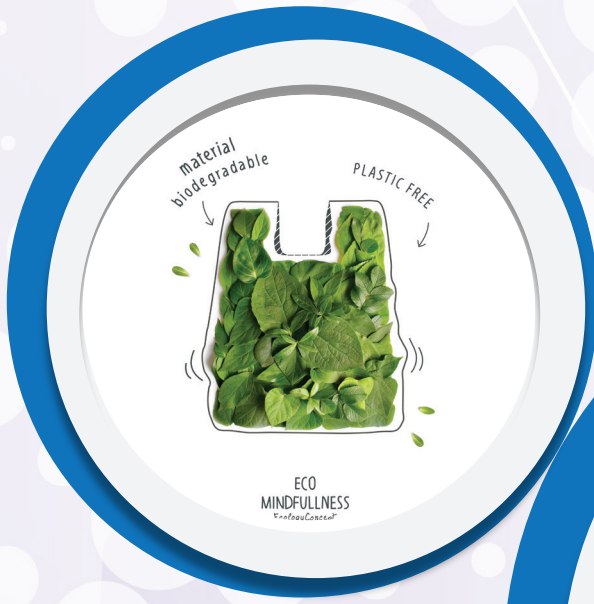

- \* **Film Thickness : 50mic – 300mic**
- \* **The thickness changes according to the load to be carried and the desired tear resistance. Thicker products have higher tear strength.**
- \* **With its easy use, save your time while packing your products.**
- \* **You can easily prepare your products in a short time by placing your products in to the endless roll, cutting and sealing to the desired size.**
- \* **Safely protects your products against dirt, dust, moisture and other external factors.**
- \* **The desired colored layflat tubing can be manufactured.**
- \* **Flexo printing can be done on the films**
- \* **Our layflat tubing films are produced from 100% recyclable polymers in an environmentally friendly way.**

## Bio Degradable Bags and Films

We give hope to our future with our Bio degradable film solutions that we have produced in order to offer a better future to future generations and to prevent the pollution in today's world where nature pollution is increasing. Petroleum-based raw materials are not used in the contents of our biodegradable products. Our products, which are produced with 100% organic ingredients, are friendly to all living things and our nature.

- ***Since our products are produced with Co-Ex technology, our products have high tear strength***
- ***Our products are suitable for food with their 100% organic content***
- ***Flexo printing can be done on the films***
- ***Bio films are 100% nature friendly as they are made of corn starch and do not contain any plastic raw materials***

## Courier bag

Courier bags are essential for transporting your goods safely and rapidly to the customer. Your goods are wrapped with self-adhesive tape and cannot be opened without being damaged. This manner, you can ship your goods with confidence and send them to any location in the country or abroad.

- \* ***Produced using the most recent Co-ex technology***
- \* ***Our goods can be printed using the flexo printing***
- \* ***Production options with or without pockets are available.***
- \* ***You may attach documents such as invoices, waybills, and notes to the courier bag pocket using the pocket.***
- \* ***Because of the high strength of our courier bags, the products inside are resistant to external elements like dust, rain, etc.***
- \* ***Various color options are available***
- \* ***Superior quality tapes are used in our products, the packaging is not opened without being harmed, and the product is carefully preserved in the package***
- \* ***Our courier bags are environmentally friendly and made of 100% recyclable plastic.***
